PREPARATION:

1. Shut off the power at the circuit breaker and ensure adequate room to install the new fixture on the VENTRIX Channel system.
2. Carefully unpack your new fixture and lay out all the parts on a clear area. Be careful not to lose any parts necessary for installation.

FIXTURE INSTALLATION TO VENTRIX SYSTEM:

The fixture features a VENTRIX adapter for power and mechanical connection to the installed VENTRIX channel system.

1. This fixture may be installed into horizontally installed, in downward facing VENTRIX channel systems such that pendant cable can hang straight with gravity. (See **FIG. 1**).
2. Fixtures are polarity agnostic, and may be installed in VENTRIX channel in either orientation. (See **FIG. 2**).
3. Insert the adapter into the channel slot. Ensure the adapter is parallel to the channel during installation. Push the adapter into the channel until fully secured. **NOTE:** Fixture adapters also feature magnets to aid in fixture locating. (See **FIG. 3**).

CAUTION: Prior to installation in channel, clear any debris from channel bus bar and fixture, particularly on magnetic surfaces.

Any conductive elements have potential to cause electrical shorting resulting in damage.

4. Review connection, be sure both sets of locking tabs are secured in channel prior to finishing installation.
